INTERNATIONAL SCIENTIFIC PROGRAM ADVISORY COMMITTEE

Chair

William Kearns — Past-President International Society for Gerontechnology, Associate Professor (Retired Meritorious), Rehabilitation and Mental Health Counseling, Department of Child & Family Studies, University of South Florida, Tampa, FL, USA

Members

Yasemin Afacan — Professor, Departments of Neuroscience and Interior Architecture and Environmental Design, Bilkent University, Ankara, Turkey

Redwan Alqasemi — Research Professor, Department of Mechanical Engineering, Center for Assistive, Rehabilitation & Robotics Technologies (CARRT), University of South Florida, Tampa, FL, USA

Tomas Bock — Prof. Dr.-Ing./Univ. Tokyo, Prof.h.c.mult. Dr.h.c., Artilleriestrasse 8b, D-80636-München, Deutschland

Jennifer Boger — Chief Scientific Officer, ESG.AI & Adjunct Professor, University of Waterloo, Canada

Don Bouwhuis — Em. Professor of Cognitive Engineering, Eindhoven University of Technology, Human Technology Interaction, Technical University of Eindhoven, Netherlands

Francesco Franchimon — President, Franchimon ICM, Netherlands

Ardis Hanson — Assistant Director, Research and Education, USF Health Libraries, University of South Florida, Tampa, FL, USA

Chapal Khasnabis — Expert, Assistive Care and Technology, India, Former Head, Access to Assistive Technology and Medical Devices Unit, World Health organization (WHO) and currently, Senior Technical Adviser for Assistive Care and Technology, Asia Development Bank (ADB)

Teh Pei Lee — Professor and Head, Department of Management. Director, Gerontechnology Laboratory, Monash University, Malaysia

Daniel (Hongdao) Meng — Professor, School of Aging Studies, University of South Florida, Tampa, FL, USA

Ben Mortenson — Professor and Department Head, Department of Occupational Science and Occupational Therapy | Faculty of Medicine University of British Columbia, Canada

Haopu (Lily) Ren — PhD Student, Interdisciplinary Studies Innovation in Dementia and Aging (IDEA) Lab, University of British Columbia

Woo Joung Shim — CTO, Wheel Line Co., Ltd., Chief Researcher, Gerontech R&D Institute of KAPASS, President, ISG Korean Chapter

Yongping Zheng — Henry G. Leong, Professor in Biomedical Engineering; Chair Professor, Department of Biomedical Engineering; Director, Research Institute of Smart Ageing; Director, Jockey Club Smart Ageing Hub, The Hong Kong Polytechnic University, Hong Kong SAR, China

INTERNATIONAL SOCIETY FOR GERONTECHNOLOGY
15th WORLD CONFERENCE | Vancouver, Canada | March 26-29, 2026

Dear Colleagues,

As co-chairs, it is our pleasure and privilege to welcome you to Vancouver to participate in the International Society for Gerontechnology's 15th World Conference. Over the next four days over 300 participants from around the world will share their knowledge and experience in 16 thematic symposia, 4 expert round table discussions, 41 oral paper sessions in which 184 papers will be presented, as well as 5 poster sessions in which 52 posters will be featured. Together, topics covered in the scientific program include cutting-edge research and theorizing with respect to: aging and disability, application fields and innovative technology for an aging society (e.g., AI, robotics, sensors, augmentation), healthy inclusive environments and architecture, dementia and technology, ethics and DEI (Diversity, Equity, and Inclusion), health and self-esteem, housing and daily living, governance, social policy, communication, transportation and personal mobility, work, leisure and social participation, and many more. The program also features exhibits, site visits, and ISG's 10th Master Class designed to build capacity among graduate students, post-doctoral fellows, and early career professionals.

The theme of the conference is Empowering Aging with Gerontechnology. As ISG President Helianthe Kort notes in her introduction to the conference issue of the society's official journal Gerontechnology, empowering is a concept that resonates across diverse communities of older adults. But to advance from rhetoric to cost effective solutions to the issues faced by these communities, evidence-based pathways are needed for technological solutions to meet the needs of an aging population.

Vancouver, known as the "Jewel of the Pacific", is the perfect venue to learn about new developments in technology and aging. We trust that you will enjoy your visit and remember it for many years to come.

Sincerely,

Gloria M. Gutman, CM, OBC, PhD, LLD (Hon.), FCAHS, FGSA
Vice-President, International Society for Gerontechnology
Professor/Director Emerita, Dept. of Gerontology/Gerontology Research Centre, Simon Fraser University
Co-Chair ISG 2026

Shannon Freeman, PhD
Professor, School of Nursing, University of Northern British Columbia
Academic Director, Centre for Technology Adoption for Aging in the North
Canadian Research Chair in Technology Adoption for Aging
Co-Chair ISG 2026

SITE VISITS

Site visits offer the opportunity to learn about innovative technology applications and cutting-edge research and development projects in the greater Vancouver area.

▶▶ SITE VISIT #1: UNIVERSITY OF BRITISH COLUMBIA & THE CENTRE FOR AGING SMART

Thursday, March 26th, 2026 | Departs SFU's Harbour Centre at 8:30AM

📍 Stop 1: IDEA Lab (Innovation in Dementia Care and Aging) at UBC

This stop will showcase 5 IDEA Lab projects:

PROJECT 1 - WhatMatters app is created for individuals living with dementia in hospitals and long-term care to enable family members to share personalized content - which staff can utilize to connect with patients and residents.

PROJECT 2 - 3D Projector, co-developed with residents/patients living with dementia in hospitals and long-term care facilities, their family, and staff, includes activities like virtual Tai Chi and cultural scenes.

3D Projector

PROJECT 3 - The AI Chatbot for People Living With Dementia in Long Term Care Project is focused on developing a conversational AI chatbot to support older adults experiencing memory loss within long-term care settings in collaboration with residents, their families, staff, and CloudMind Software Inc.(industry partner).

PROJECT 4 - The Indigenous VR Storytelling initiative, conducted in partnership with the Museum of Anthropology, uses VR technology to preserve and share Indigenous stories in an immersive format that enhances engagement for older adults, including those with dementia.

Indigenous VR Storytelling

PROJECT 5 - The Aether Robot project contributed to the development and evaluation of Aether, which features autonomous navigation, voice recognition, and entertainment capabilities. It ensures safety through environmental monitoring and engages socially with caregivers and residents, telling jokes, stories, and welcoming visitors using face and voice recognition.

📍 Stop 2: The Centre for Aging SMART

The Centre for Aging SMART is a 50 faculty, 150 trainee research centre under the Vancouver Coastal Health Research Institute. The Centre seeks to positively impact the health and quality of life of individuals living with the effects of aging or disability by developing novel Solutions for Mobility, Activity, Rehabilitation and Technology (SMART). Facilities include a Medical Imaging Suite, Clinical Assessment Suite, Active Health Suite (Exercise), Surgical Research Suite and Fall Prevention Clinic and Registry.

SITE VISIT #2: BRITISH COLUMBIA INSTITUTE OF TECHNOLOGY

Thursday, March 26th, 2026 | Departs SFU's Harbour Centre at 1:30PM

Stop 1: Centre for Applied Research and Innovation (CARI)

Join Team Leaders, Drs. Yvette Jones and Jaimie Borisoff, for an engaging tour of the BCIT's CARI, home to the MAKE+ Applied Research Group. With a mission of developing creative solutions for better lives, MAKE+ focuses on improving the daily living, work, and recreational experiences of older adults and people with disabilities through applied research and innovative design.

This stop will have four hands-on, technology-driven projects aimed at enhancing accessibility and mobility:
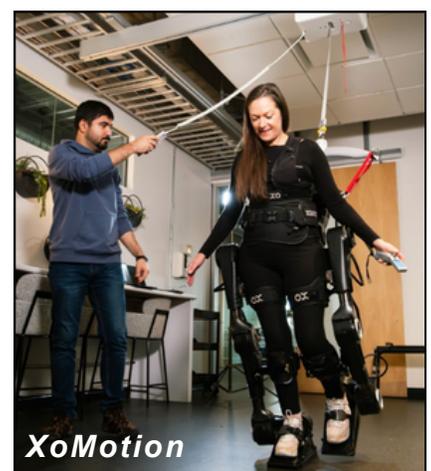

1. Dr. Tong Louie Living Laboratory: A cutting-edge space for 3D Motion Capture, physiological monitoring and data collection supporting human-device interaction research.
2. The BEAST (BCIT Extending Articulating wheelchair for Serious Terrains): Winner of the 2024 Cybathlon Gold Medal, this high-performance device is engineered to navigate and overcome complex real-world terrain.
3. Adapted exercise machines – Featuring the aROW and aSKI for stable seated exercise, and the AAPLEwalk, an upright elliptical system offering fully supported walking exercise.
4. Robotic dogs – early-stage research into robotic assistance animals designed to support mobility and daily living activities for older adults.

Stop 2: Human in Motion Robotics

Driven to push past the limits of traditional, non–self-balancing exoskeletons, longtime collaborators Dr. Ed Park and Dr. Siamak Arzanpour set out in 2014 to reinvent what mobility technology could be. Their partnership sparked the creation of a next-generation exoskeleton XoMotion.

During this stop, visitors will step inside the lab where it all began and witness their groundbreaking robot, XoMotion, in action!

SITE VISITS CONT'D

▶▶ SITE VISIT #3: HEALTHY INCLUSIVE ENVIRONMENTS & ARCHITECTURE

Sunday, March 29th, 2026 | Departs SFU's Harbour Centre at 8:30AM
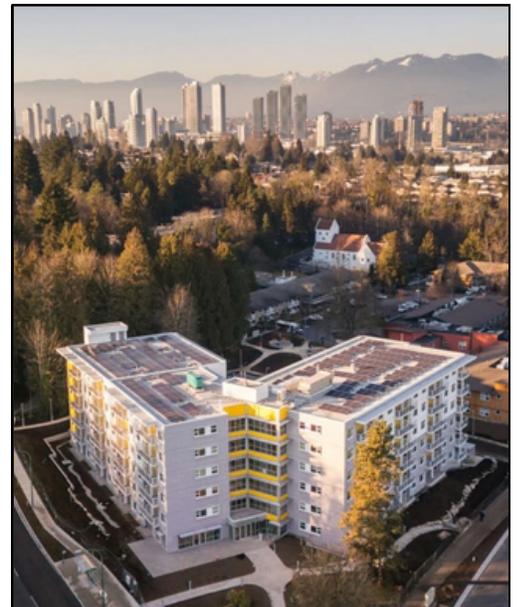

📍 Stop 1: Seton Villa

What goes on in a retirement centre? Come find out. Seton Villa invites you onsite for a behind-the-scenes look at how we're redefining senior living in our 19-storey, non-profit community, home to 225 vibrant residents. Fresh off our 50th anniversary, we're proud to share how we've reduced loneliness to just 5% through targeted strategies, resident-led Java Music groups, and a strong culture of connection. We also broke new ground by hiring a full-time Kinesiologist, boosting fitness participation and energy across the building, from aquafit to "Wimbledon Workouts." Over 50% of residents now meet recommended movement goals, and they're loving it. You'll hear real stories, feel real connection, and see real movement in action. Plus, tour our evolving campus, including a $37M revitalization and a brand-new 48-suite accessible building with a community "main street." Come see what's possible when purpose, wellness, and innovation come together.

📍 Stop 2: Dania Society

Dania Society invites you to discover a unique senior living community rooted in 80 years of Danish heritage and guided by values of Excellence, Compassion, Diversity, Respect, and Integrity. Our nonprofit "Campus of Care" spans 7 landscaped acres and offers 214 Independent Living suites, 40 Assisted Living suites, and 102 Residential Care beds. One of our buildings, Dania Home, features six neighbourhoods with 17 beds each and advanced point-of-care technology in every room, ensuring high-quality, complex care and helping us achieve zero COVID-19 fatalities during the pandemic. We are committed to quality assurance and innovation, recently developing a concept for a mobile app to enhance caregiver communication and care planning through language translation. This tool aims to reduce aggressive behaviours, support residents and families in understanding care plans, and could be potentially used in hospitals and home care settings. Currently at the proof-of-concept stage, the app's further design and eventual deployment have the potential for more collaboration and evaluation beyond Dania.

GREETINGS
Dan Levitt, Seniors Advocate, Province of British Columbia
Mark Barnes, Interim Associate Vice-President, Strategy and Outreach
Bridgette Murphy, CEO, AGEWELL
Patricia Versteegh, Senior ./Science Strategist, CIHR Institute of Aging (on behalf of Director Dr. Jane Rylett)

KEYNOTE ADDRESS LUCIEN ENGELEN

BRIDGING GENERATIONS:
HOW TECHNOLOGY IS TRANSFORMING AGING & CARE

Lucien Engelen's bio:

9:00 - 11:00 PM | Wosk Centre - 580 Hastings Street

WELCOME RECEPTION

After the Opening Ceremony, please make your way to the Wosk Centre for Dialogue, a spectacular heritage building designed specifically for meetings and conferences that facilitates dialogue and enhances interaction. Located at 580 Hastings Street - directly across the street from the conference venue at SFU's Harbour Centre campus

FRIDAY, MARCH 27TH, 2026

8:30AM - 10:00AM | Room 1400, Segal Centre

KEYNOTE ADDRESS PROF. LIANG-KUNG CHEN, MD, PHD

PERSON-CENTERED INTEGRATION OF ICOPE FRAMEWORK AND SMART TECHNOLOGIES FOR HEALTHY LONGEVITY

Prof. Liang-Kung Chen's bio:

10:00AM - 10:30AM | REFRESHMENT BREAK

10:30AM - 12:00PM | PARALLEL SESSIONS

▷ **SPONSORED SYMPOSIUM | Room 1400, Segal Centre**
From Ethics to Governance: Making AI Accountable in Aging and Care
Convenor: M. Chrostowski

Accountability for AI in AgeTech: A Sociotechnical Ecosystem Perspective
   A. Mihailidis

Making it Real: Inclusion of Age-Related Values in AI Technologies
   J.Boger

Oversight of AI Across Care Contexts: A focus on homecare
   S. McKay

▷ **SYMPOSIUM | Room 1600, Canfor Policy Room**
Exploring the ethical aspects of technology for older adults and people living with dementia
Convenor: A. Flynn

Ethical considerations of using robots for older adults with dementia
   L. Hung, P. Y Zhao, L.H. Ren

What Informs the Ethical Development and Use of Virtual Reality for Older Adults with Dementia in Hospitals? A Critical Evaluation of Ethical Frameworks
   L.H. Ren, L. Hung, W. B. Mortenson, J. Henderson

What Constitutes Ethical Use of Innovative Technologies for Dementia Care?
   A. Flynn, D. Anantharaman, J. Liddle, T. Vandemeulebroucke, W.Q. Koh

Ethical and Responsible Innovation in AgeTech: Insights from Reviews and Stakeholder Consultation
   M.L. Fang, E. Stone, R. White, O. Bryanton, J. Mann, M. Moulton, C. Chu, J. Boger, J. Sixsmith, H. Loret, A. Sixsmith

10:30AM - 12:00PM | PARALLEL SESSIONS CONT'D

▷ **ORAL PRESENTATION SESSION | Room 1315, Scotia Bank Lecture Hall**

Mobility & Transport

Chaired by: J. Garcia-Alonso

Walking sticks as an Assistive Technology Resource for Mobility in Older Adults: Effects on Locomotor Performance and Perceived Effort
G.C. Agostinho, G.M.P. Thomazelli, K B. Agostinho, E.O.R.C. Goulart, R.T. Monteiro, M.S. Julio, R.C.S. Kuroishi, F.O. Medola, C.S.S.Castro

Tactile Sensor Integration in Ergonomic Wheelchair Pushrims
N. Zaghi, J. Borisoff, D.W. John

Use of Transportation Technologies in Later Life
F. Hatami, A. Siren, S. O'Hern

Mobility Device Use among Community-dwelling Older Adults: A Mixed-methods Comparison of the U.S. and China
X. Liu, S.E. Baumann, A.L. Rosso, E.M. Venditti, Y. Yao, S.M. Albert

▷ **ORAL PRESENTATION SESSION | Room 1425, Repap Policy Room**

Application Fields & Innovative Technologies for an Aging Society

Chaired by: H. Kort

Multifactorial Determinants of Access and Adaptation in Aging Technologies: Lived Experiences of the Elderly in Cape Breton
A. Fasanmi, L. Manthena, S. Zheng, C. Deveaux

Predicting Mobility Assistive Device Needs in Elders Using EHR and Healthcare Utilization Data
C.T. Wu, C.Y. Chiang, J.Y. Wang, Sanford P.C. Hsu, F.T. Wang, Y.C. Chen

Effective Communication of Driving Feedback: Principles and Strategies for Empowering Older Adults
L. McCauley, K. Van Benthem, B. Wallace, C. Herdman, J. Keillor, F. Knoefel, S. Marshall

Basic Values of Gerontechnology
H. Kort

Use of digital imagery technology for management of post-operative delirium: A feasibility study
E. Tam, K.L. Chu, M.N. Wong, S. Chien, J. Lam, Y.P. Zheng

▷ **ORAL PRESENTATION SESSION | Room 1510, Tree Island Conference Room**

Governance, Social Policy, & Communication: Global

Chaired by:

Brazilian Franchise Network of LTCFs: Experience Report on Standardized Practices that Ensure Healthy and Dignified Aging
E. de Faria Ferreira

Adoption and Needs of Smart Care Technologies in Long-Term Care Facilities in Taiwan: A Nationwide Survey
P.Y. Chu, Y.L. Hsu

Digital participation in old age: Municipal governance concept in Frankfurt, Germany
R. Werny

Wireless Network Proficiency Questionnaire (WNPQ) for Brazilian Older Adults: Translation, Back-Translation, and Synthesis
S.K. Mateus, G.P. Cruz, W.R. Boot, P.C.Castro

Going global with user-friendly gerontech: what's missing in business support?
T. Palo, A. Kaipainen, M. Elomaa-Krapu

▷ **ORAL PRESENTATION SESSION | Room 1520, Barrick Gold Conference Room**

Dementia & Technology

Chaired by: S.B. Schmidt

Using Virtual Reality and Artificial Intelligence (VRMemory©) to Promote Multi-Sensory Reminiscence Experiences and Social Connectedness for People with Dementia and Caregivers
  W. Sun, A. Quevedo, E. Sara, P. Sarah, K. Fatima, A. Sulaiman, D. Warner, R. Inguino

Preliminary insights from an AI-assisted scoping review into personalised communication of Socially Assistive Technologies
  B.M. Hofstede, S. Ipakchian Askari, R.H. Cuijpers, J.C.F. Ket, W.A. IJsselsteijn, H.H. Nap

Examining technology adoption and ongoing use by older Australians with mild cognitive impairment

STRATEGIC SPONSORS

AGE-WELL (www.agewell-nce.ca) is Canada's technology and aging network. We have mobilized a vast community of researchers, partner organizations, older adults, caregivers, and future leaders to accelerate the delivery of technology-based solutions that make a meaningful difference in the lives of Canadians. AGE-WELL is driving impact across a trilogy of pillars – research, capacity building and adoption. Together, these pillars support a strong innovation pipeline from foundational research to technology adoption.

Located in the spectacular landscape of northern British Columbia, the **University of Northern British Columbia (www.unbc.ca)** is one of Canada's best small universities. UNBC provides outstanding undergraduate and graduate learning opportunities that explore cultures, health, economies, sciences, and the environment. As one of B.C.'s research-intensive universities, we bring the excitement of new knowledge to our students, and the outcomes of our teaching and research to the world. UNBC is a university both in and for the North. We are also Canada's Green University™, leading the way to a more sustainable future for all.

The **Philippine Retirement Authority (PRA)** is a government-owned and controlled corporation (GOCC) attached to the Philippine Department of Tourism (PDOT). Established in 1985, its primary mandate is to position the Philippines as a premier global destination for retirees and foreign investors. By promoting a high quality of life, the PRA aims to attract foreign nationals and former Filipinos, encouraging them to make the Philippines their second home. Beyond visa processing, the agency works to integrate retirees into the local community by accrediting retirement facilities, property developers, and healthcare providers, ensuring that every resident has access to world-class service and a secure living environment.

PLATINUM SPONSORS

The **CIHR Institute of Aging's (CIHR-IA)** mandate is to support research, promote healthy aging and address causes, prevention, screening, diagnosis, treatment, support systems, and palliation for a wide range of conditions associated with aging. By championing an inclusive approach to research excellence that considers health across the life course and addresses social and structural determinants of health, CIHR-IA funds evidence-based research that informs public policy, programs and services. IA's mission is to advance training, research and knowledge mobilization to maintain and improve the health and wellbeing of all Canadians as they age. CIHR-IA promotes the inclusion of age, aging and the role of persons with lived and living experiences and their caregivers in the entire research ecosystem.

PLATINUM SPONSORS CONT'D

A founding faculty in 1965, **Simon Fraser University's Faculty of Arts and Social Sciences (FASS)** is a leader in education and research. Home to the Gerontology Research Centre, the Science and Technology for Aging Research Institute, and the Tong Louie Living Lab, FASS is the base for many innovative centres and institutes. Our interdisciplinary expertise in policy, governance, and technology ensures an informed approach to health and well-being; our collaborative approach sparks vibrant and inclusive communities. FASS' flourishing intellectual community leads the way in meaning-making and solving the world's pressing problems.

The Consulate General of the Kingdom of the Netherlands in Vancouver is part of the diplomatic network of the Netherlands in Canada. Our goal is to further strengthen the already close relationship between Canada and the Netherlands, including in the field of healthcare. The Netherlands believes that people should be able to age with dignity, autonomy, and quality of life. Both the Netherlands and Canada face similar challenges related to ageing populations, workforce pressures, and rising care demands. By working together and sharing knowledge, research, and innovation, we can develop smarter, more human-centred solutions for elderly care.

GOLD SPONSORS

The **Centre for Technology Adoption for Aging in the North (CTAAN) (www.ctaan.ca)** is a National Innovation Hub that supports aging in northern and rural communities by making technologies more accessible to older adults, caregivers, and health systems. We focus on testing, piloting, implementing, and promoting solutions tailored for northern and rural settings. Through a partnered, community-driven approach, we ensure technologies truly enable, empower, and engage those aging across the North.

SILVER SPONSORS

MindfulGarden Digital Health, Inc. (www.mindfulgarden.com) Antipsychotic drugs and physical restraints should not be tools of first reach when addressing agitated behaviours in the hospitalized elderly. MindfulGarden is the first clinically validated affective biofeedback platform that harnesses biometrics to influence bio-state, using interactive visualizations and soundscapes to 'calm,' with the goal of sending each patient home, brain healthy. Health Canada approved, with a foundational study published in the NATURE npj journal in 2024, MindfulGarden is currently in hospitals in Canada and Asia.

SILVER SPONSORS CONT'D

The **ANGEL Lab (Alibaba–NTU Global e-Sustainability CorpLab)** at Nanyang Technological University focuses on sustainable AI, AI for sustainability, and human longevity. The lab conducts interdisciplinary research spanning AI systems, human–AI interaction, and data-driven behavioral design, with a strong emphasis on real-world deployment and translational impact. Through close collaboration with industry and public stakeholders, ANGEL Lab develops scalable solutions for preventive healthcare, cognitive health, active ageing, and sustainable lifestyle interventions.

The **Rehabilitation Engineering Research Center on Technologies to Support Aging among People with Long-Term Disabilities (TechSAge RERC) (www.TechSAgeRERC.org)** is a collaborative grant center established in partnership with the University of Illinois Urbana-Champaign, the Georgia Institute of Technology, Georgia State University, and Person in Design. Founded in 2013, TechSAge features multidisciplinary research, development, and training projects that are dedicated to understanding the needs of, and developing supportive technologies for, people aging with long-term vision, hearing, and mobility disabilities.

A pioneer in scholarly, open access publishing, **MDPI (www.mdpi.com)** has supported academic communities since 1996. Based in Basel, Switzerland, MDPI has the mission to foster open scientific exchange in all forms, across all disciplines. Our 501 diverse and open access journals, including 492 peer-reviewed journals and 9 conference journals, are supported by more than 295,000 academic experts who share our mission, values, and commitment to providing high-quality service for our authors. We serve scholars from around the world to ensure the latest research is freely available and all content is distributed under a Creative Commons Attribution License (CC BY).

BRONZE SPONSORS

The **ISG Korean Chapter** presents the **Aging Sage Life Simulation (www.agingsage.org)**, a gerontechnology-based program. This is an interactive, one-hour simulation guided by a gerontechnology planner. Using a life canvas that allows participants to view their life at a glance, they map their aging process, reflect on upcoming life transitions, and explore life goals and small personal aspirations. Through this process, participants consider how science, technology, and living environments may support these goals and envision possible futures. The program offers a meaningful opportunity for active and self-directed later-life planning.

SUPPORTERS

Michael Smith Health Research BC (www.healthresearchbc.ca) Funded by our provincial government, Health Research BC supports a health research system that improves health and health care and strengthens the economy. We fund people and research, and we partner on shared opportunities. Our programs build research careers, our investments advance priority research, and our expertise accelerates the use of research evidence.

The **Canadian Association on Gerontology** is Canada's premier multidisciplinary association in the field of aging. Members benefit from discounted conference fees, a free subscription to the Canadian Journal on Aging, eligibility for awards and prizes, and much more. We have an active Student Connection and special rates for students and those 65+! Learn about membership and our CAG2026 conference: **https://cagacg.ca/**

It is a pleasure to invite you to attend the **23rd IAGG World Congress of Gerontology and Geriatrics** in Amsterdam, July 5-8, 2026 on behalf of the International Association of Gerontology and Geriatrics (IAGG), the Dutch Society for Gerontology (NVG-KNOWS), the Netherlands Clinical Geriatrics Society (NVKG), and the Dutch professional organisation of Nurse Practitioners in Geriatrics and Gerontology (V&VN-GG). Visit **www.iagg2026.org**

The Research Institute for Smart Ageing (RISA) at PolyU (www.polyu.edu.hk/risa/) was established in 2021 with over 30 founding members from 15 departments. Led by Professor Yongping Zheng, RISA promotes interdisciplinary research in smart health, intelligence, environment, society, and gerontechnology. Its initiatives include community-based research and the RISA Ageing Data Registry System (ADRES). Together with the Jockey Club Smart Ageing Hub, RISA addresses Hong Kong's ageing population challenges through innovation and collaboration.

The **SFU-BCIT Dr. Tong Louie Living Lab** was opened in 1995 thanks to the generous support of an endowment from Dr. Tong Louie. SFU (Gerontology) and BCIT (Applied Research) have worked in collaboration with a mission to enhance independent living and the quality of life among older adults through person-environment fit and the development and evaluation of environmental and technological innovations.

EXHIBITORS CONT'D

Niagara College's Healthy Aging and Wellness Innovation Centre (HAWIC) **(www.ncinnovation.ca/innovation-centres/healthy-aging-and-wellness)** aims to improve the quality of life of older adults by conducting applied research, shifting perspectives, and sharing knowledge related to 5 pillars: Technology, Aging-in-Place, Care and Services, Community, and Education and Knowledge Mobilization. The research team at HAWIC investigates and explores innovative solutions for tackling the challenges faced by our aging population, while working alongside our students and academic programs, industry partners, and community organizations.

We're a global pioneer in gerontology education and research. The **USC Leonard Davis (www.gero.usc.edu/)** is the first and most comprehensive professional school of gerontology in the United States, with a long history of innovation in the field. Since 1975, students, faculty and colleagues from around the globe have come here to explore and shape the future of aging. Our alumni make scientific breakthroughs, advocate for those who often go unheard, and lead dynamic companies, among other exciting careers.

The **Special Resident Retiree's Visa (SRRV)** is a highly competitive, non-immigrant, multiple-entry visa designed to offer permanent residency to eligible foreign nationals. Known for its flexibility, the SRRV allows holders to reside in the Philippines indefinitely with multiple-entry privileges, exempting them from the annual reports and exit clearances typically required of other foreign residents. One of its most attractive features is the "Classic" scheme, which allows the required visa deposit to be converted into active investments, such as the purchase of a condominium unit or long-term property leases. This makes the SRRV not just a residency permit, but a strategic tool for foreigners looking to invest in the country's growing real estate market.
